

Please do NOT pass any legislation that could lessen Indiana's Telephone Privacy Law. It has been almost a year since I added my name to the Indiana Privacy List. It has made a change for the better for my life at home, especially in the evenings during the work week. Prior to the Privacy List I would have to leave my Internet connection on all evening in order to not be bothered by telephone marketers. Then I would also miss personal calls and had to live with that just so that I would not be bothered. The Indiana privacy law has made a huge difference in the quality of life for me. I no longer have to leave my internet connect on in order to have peace in the evenings. I can get personal calls now. I don't dread the phone ringing in the evenings now because I can be sure that it is not a telemarketer. Again, Please do not do anything to water down Indiana's Telephone Privacy Law. Thank you
